

The new Student Email Service hosted by Google is now Live! All students attending a Maricopa Community College have access to Gmail as well as Google Apps enabling students to do their school work more conveniently.

The system will provide each student with an address **@maricopa.edu** as well as a number of benefits, including:

- Useful collaboration tools such as Google Docs, an online suite of office productivity applications featuring word processing, spreadsheets and presentations. Google Docs allows collaboration with others on the same documents in real time. Documents are saved online, so you always have access no matter what computer you use
- A lifetime email address, a reliable, secure email service, and a powerful anti-spam service
- Access to calendaring, tasks and scheduling features
- An easy way to forward email to other personal email accounts
- Instant messaging with voice and video

To login to your Gmail account via GoogleApps [click here](#). To read the Maricopa Gmail **Frequently Asked Questions** [click here](#). Colleges will use this new email address to send students information about financial aid, enrollment, and other school related communications.

The new student email is available immediately and utilizes the student's MEID for the address @maricopa.edu and their current MEID password for access. All students are assigned an MEID and like the MEID, the email account will be used for all Maricopa Community Colleges.

- Example: [MEID@maricopa.edu](mailto:MEID@maricopa.edu) or [ANN1234567@maricopa.edu](mailto:ANN1234567@maricopa.edu)
